

Solutions for 21st century libraries™

Peek-A-Book Total Access

Reach your patrons any place, any time, any platform.

You have great children's picture books, but how do you help parents and kids discover them from home?

With Peek-A-Book Total Access, the solution is only a click away. Our web-based service uses dazzling audio-visual previews to promote your collection. Whether embedded into your own pages or linking to the Peek-A-Book web viewer, your patrons can explore hundreds of titles and check out the print versions or download the ebooks directly to their home computer or mobile reading device.

Peek-A-Book's ever-growing content library features books librarians love — Caldecott Winners, perennial favorites, and starred reviews from *School Library Journal* and *Booklist*. With over 300 titles and more added every month, the previews combine images from the book with narration, music and effects to give children a peek at the story without telling them how it ends. Our simple-to-use administrative tools make programming a breeze. So sit back, relax, and watch your circulation soar!

- With affordable subscription pricing, this innovative service is easy on your budget.
- Peek-A-Book Total Access — The perfect tool for the 21st century library.
